

BALANCING WEIGHT TYPE 84 B

✓ Black Powder Coating

The quality powder coating protects the whole weight against corrosion. The black surface matches the colour of steel rims.

✓ Easy Application

Weights are easy to install because of the special Perfect Equipment clip.

✓ Universal Fit

Thanks to its special shape, Type 84 fits on most European and Japanese Steel rims for Passenger cars and even on most LCV rims.

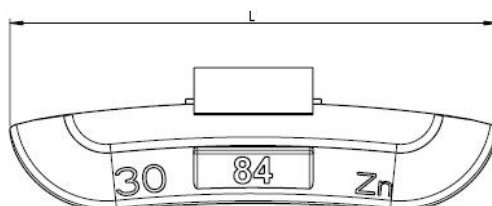

✓ Less Scratches

Zinc is a very strong, but soft metal. With proper application, zinc wheel weights are less likely to scratch the rim during installation and removal.

✓ Reliable Fit

The Knock-on weights feature a clip-in-body design, thus providing an inseparable bond for superior clamping force.

Specifications – Balancing Weight Type 84 B

		Type 84 B									
Grammature		5	10	15	20	25	30	35	40	45	50
